Anna Jungmannová

Prospective PhD student — Digital Forensics & Cyber Threat Intelligence

Prague, Czech Republic · ajungmannova@gmail.com · ajungmannova.github.io

linkedin.com/in/anna-jungmannova · github.com/ajungmannova

RESEARCH INTERESTS

Cyber Threat Intelligence · Digital Forensics · Cybercrime Investigation · Darknet & OSINT Analysis · Data-driven Forensics

EDUCATION

DEGREE PROGRAMS

Prague University of Economics and Business (VŠE) *Prague, Czech Republic · Sep 2024 – Jan 2027 (expected)*

M.S. in Information Management

Class rank: 3 / 59 (top 5.08% of cohort, university-computed) · Average 1.3/4.0 Czech scale (≈ 4.16/4.5 Korean-scaled) · Coursework average 91.24%

Thesis: Cybercrime-as-a-Service · Supervisor: prof. Ing. Petr Doucek, CSc. · Submission January 2027 (see Research)

- Relevant coursework: Digital Forensic Analysis (98%), Information Systems Security Management (99%), Penetration Testing of IS Security (91.5%), Introduction to Cybersecurity (91.5%), Social Informatics (91%)

Masaryk University *Brno, Czech Republic · Sep 2017 – Feb 2020*

B.S. in Ecological and Evolutionary Biology

EXCHANGE & SHORT-TERM PROGRAMS IN KOREA (NON-DEGREE)

Korea University — International Summer Campus *Seoul, South Korea · Jul 2026*

GPA 4.25/4.5

- Coursework: Intermediate Korean (A+), Introduction to Hanja: Chinese Characters in Korean (A)

Konkuk University — Exchange Semester *Seoul, South Korea · Sep 2025 – Dec 2025*

Exchange student · GPA 4.13/4.5

- Coursework: Media Research Methods (A+), Perceptions and Realities of Developing Countries (A+), Understanding Korean Culture (A+), Korean Intermediate (B+), Korean History and Culture Shown in Films and K-Dramas (B+)

University of Seoul — Summer Korean Language & Culture Program *Seoul, South Korea · Jun 2023 – Jul 2023*

Korean language and Korean culture courses

RESEARCH & TALKS

M.S. Thesis — Cybercrime-as-a-Service *VŠE · 2025 – 2027*

- Built Python scrapers run over Tor from Tails OS to collect three darknet marketplaces (Abacus, Nexus, Vortex) every three days, May–June 2025, under a documented operational-security protocol.
- Produced a public dataset of 14,006 observations of 1,609 unique products from 74 vendors, manually coded into 11 CaaS categories (Cohen's κ = .678); data and analysis code released on GitHub.
- Found that cross-market price differences (significant in 10 of 11 categories at listing level) largely vanish at vendor level: they reflect which vendors sell where, not the platform. Malware and exploits dominated every market (47.42% of products) and listed prices were nearly fixed (3.05% repriced).
- Showed that multi-homing vendors (21 of 74) run larger catalogs and mostly keep one price across markets; captured the final weeks of Abacus before its July 2025 exit.

TALKS

- OpenAlt 2026, Brno — Darknet marketplaces and Cybercrime-as-a-Service *(upcoming)*
- DCG420 (DEF CON Group 420, Czech chapter) — November 2026 *(upcoming)*

PROFESSIONAL EXPERIENCE

Security Delivery Senior Analyst — Accenture *Prague · Sep 2020 – Present*

- Design and develop custom Privileged Session Manager (PSM) and Central Policy Manager (CPM) connector components for CyberArk, enabling secure, auditable privileged access and credential rotation
- Lead security delivery across privileged access management (PAM) infrastructure projects, from requirements analysis through technical deployment
- Bridge technical security engineering and governance stakeholders, translating PAM architecture and session-audit capabilities into risk reporting used in decision-making

Quality Assurance Engineer — Figure *Brno · Jan 2018 – Aug 2020*

- Managed infrastructure reliability and release quality using AWS, Jira, and CI/CD pipelines
- Standardized testing and training protocols; mentored team members in high-availability, high-stakes environments

SKILLS & LANGUAGES

Languages	Korean — TOPIK I, Level 2 (192/200) · English — C1 (IELTS 8, CAE 198/200) · Czech — native
Forensics & CTI	Digital forensics, incident response, cyber threat intelligence, OSINT, darknet analysis, vulnerability assessment
Research methods	Web scraping over Tor, manual coding with inter-coder reliability, non-parametric statistics (Kruskal–Wallis, Dunn, Mann–Whitney U, Wilcoxon), bootstrap and permutation tests
Programming	Python (requests, BeautifulSoup, pandas, SciPy, matplotlib), C#
Systems	Linux, Tails OS, Tor, AWS, Git · CyberArk PAM (PSM/CPM connectors, credential rotation, session auditing)
Certifications	Udacity Nanodegrees: AI Programming with Python; AWS Machine Learning Engineer

AWARDS & ACTIVITIES

Award	Junction Hackathon — Track Winner (team)
Memberships	DEF CON (Online), OWASP Czech Chapter — active member
Volunteering	Co-created the curriculum of the Czechitas Cybersecurity Academy (non-profit tech education for women; ~480 participants across four cohorts) · Khan Academy Czech translator · Kimjang volunteer, Seoul (2025) · Charity races, environmental cleanups, blood donation

MEDIA

Selected as company representative for Accenture's Czech/Slovak campaign encouraging women into IT, resulting in a podcast, an interview article and a webcast on Heroine.cz (May 2022). Upcoming: guest on the Czech Cyber TV podcast.
